THE DOCTOR IS IN

Townhouse Spa-New York

The Dunton Hot Springs Spa (below right) isn't the only facility combining the old with the new. The Townhouse Spa is an actual restored townhouse located in Manhattan, New York. This 6,000 square-foot townhouse-turned-spa has overlapping men and women spas that emerge out into separate floors. The Townhouse spa explores the true nature of being an "uptown girl" as well as a businessman or woman. The special treatment Uptown Girl includes a variety of sources to make a woman feel like a true celebrity. From hair extensions to eyelash extensions, there is no uncertainty that once you're done with the treatment you will feel like a new person. Each floor has treatment rooms for facials and massages, steam rooms, showers and locker resources. The men's floor has the Townhouse Spa Men's Lounge, where the old boy's club meets contemporary society. Men can watch sports and movies, or play video and board games in luxurious leather sofas and armchairs. The women's floor is dedicated to eyebrow threading, make-up stylists, steam rooms, multi-purpose treatment rooms, private suites and much more. The Townhouse spa also offers a new exclusive spa treatment titled the "Magic Wand" which helps treat cellulite. The Townhouse Spa isn't holding back from making every person feel like a Hollywood celebrity.
